

## Range Card Numbers

We have a new computer system for the range gate. I need the following number off of your current range card.

The front of the card has blue writing on it and usually has the Negaunee Rod & Gun sticker on it.

The back has HID in white on the lower left corner.

The number I need is on the back is on the upper right hand corner if the oval cutout is on the right side. It is a 5 digit number followed by a space and then several other numbers. I need the first 5 digits. See picture below.
